

Amerisolar Applied 62 Patents in China and 2 in USA about Panels and Systems Last Year

San Francisco, February 6th, 2020, As a solar brand originated from America (USA) with production bases in USA, China, and South Korea, Amerisolar is taking more competitive strategies based on its **Leading Solar Technology, ESS Technology, High Quality, and worldwide 7/24 Door-to-Door logistics services.**

Amerisolar announces today that, Company applied 62 patents in China and 2 patents in USA in 2019, which are related to solar panels, solar systems and solar power plant maintenance. These applied patents include Amerisolar new technology about high-efficiency solar panels, half-cut-cell panels, glass-to-glass transparent panels, extra-large-size panels (96 cells and up to 540wp) and other technology used in daily solar plant maintenance.

Amerisolar continue increasing larger investment in solar PV technology and related areas. In 2020, Company will focus more on BMS and ESS technical development and “HL” (Higher-efficiency+ Lower-cost) PV panels development. Amerisolar’s key and leading advantage in worldwide solar markets will continuously be higher efficiency, higher quality, lower cost and better services.
